PROFESSIONAL SUMMARY

Results-driven UI/UX Designer with 1 year of experience creating intuitive digital products in a B2B SaaS environment. Skilled in transforming complex user needs into clean, accessible, and pixel-perfect interfaces, from wireframes and user flows to high-fidelity Figma prototypes. Experienced in collaborating with product and engineering teams in Agile environments, with a strong foundation in UX research, design systems, interaction design, and basic HTML/CSS for smooth developer handoff.

WORK EXPERIENCE

UI/UX Designer

Mar 2025 – Present

Emayam Technologies Pvt. Ltd. · Chennai, Tamil Nadu

- ▶ Owned end-to-end UI/UX design across 3 live B2B SaaS products — FSM Dashboard, Employee Monitoring Application, and POS Application — from wireframe to developer-ready Figma handoff.
- ▶ Collaborated with Product Managers and engineers in Agile sprints; participated in design reviews, sprint planning, and daily stand-ups to deliver on schedule.
- ▶ Designed role-specific interfaces for multiple user types (field agents, managers, HR, admins, cashiers) ensuring each persona accessed only relevant data.
- ▶ Built and maintained reusable Figma component libraries — including cards, data tables, status badges, navigation patterns, and form elements — ensuring visual consistency across all 3 products.
- ▶ Performed competitor benchmarking (Teramind, Zoho POS, FSM platforms) to identify UX gaps and inform design direction.
- ▶ Delivered annotated Figma handoff specs with spacing, typography, and interaction details — reducing developer clarification requests.

KEY PROJECTS

Field Service Management (FFM/SFA) Dashboard · B2B SaaS Web & Mobile Application

- ▶ Led end-to-end UX design of an FFM platform serving field agents and managers, covering 6+ modules — Live Tracking & Map View, Beat Plan & Tour Planning, Task Management, Customer Visit Scheduling, and Product & Customer Management.
- ▶ Conducted user research and stakeholder interviews to map role-specific workflows; designed responsive web and mobile interfaces from low-fidelity wireframes to high-fidelity Figma prototypes.
- ▶ Designed an intuitive map-based live tracking interface allowing managers to monitor field agent locations, visit statuses, and route progress in real time.

Employee Monitoring Dashboard · B2B SaaS Web Application.

- ▶ Contributed UI screens across Screen & Activity Monitoring, Attendance & Time Tracking, Productivity Reports, and Asset Management modules.
- ▶ Designed role-specific dashboards for Employees, Managers, and HR/Admins — presenting complex monitoring data using charts, KPI cards, and status tags for quick scan ability
- ▶ Designed data-heavy dashboard screens with clear visual hierarchy, RBAC, using charts, progress indicators, and status tags to present complex monitoring data in an easily scannable format.

SKILLS & TOOLS

Figma	Adobe XD	Adobe Illustrator	Adobe Photoshop
Balsamiq	Design System	Heuristic Evaluation	User Flows
Wireframing	Prototyping	User Research	Usability Testing
User Personas	Information Arch.	Interaction Design	Responsive Design
HTML & CSS (Basic)	Journey Mapping	Design Handoff	Python (Basic)

EDUCATION & CERTIFICATION

UI/UX Designer Mentorship Program Certification <i>Dementee Academy, Pondicherry · 4-month internship</i>	<i>March 2024</i>
Bachelor of Engineering — Electronics & Communication (ECE) <i>CK College of Engineering and Technology, Cuddalore</i> CGPA: 8.25	<i>Aug 2022</i>
